Reduced Outpatient Services Notice

Ivinson MEMORIAL HOSPITAL
AN AFFILIATE OF UCHealth

Reduced Outpatient Services

Effective March 17, 2020

Effective immediately, Ivinson will be reducing non-emergent outpatient services in order to ensure the continued safety of patients, staff, providers and the community.

This will allow our staff to focus on critical care and emergent patients while also limiting patient and staff interactions. The health and safety of our hospital and our community continues to be our number one priority and by cutting back on non-essential services, we are able to safely provide care to those that need it most.

Please take a moment to review this important information. We need to work together to ensure the continued safety of patients, staff, providers and the community.

The following departments will be suspending non-urgent orders and walk-in services:

- Imaging
- Laboratory
  - With exception of critical care or for medication needs
- Rehabilitation
  - With exception of wound care, post-operative ortho, and stroke patients
- Cardiopulmonary
  - With exception of urgent stress testing and EKGs
- Clinical Nutrition all services are suspended until further notice

Patients requiring urgent or emergent care will not experience any delay in outpatient services.

Thank you for helping us keep our community safe and healthy during this time
